SUBJECT INDEX

Volume 85

aircraft measurements 1

boundary layer
  convective 35, 197
  flow over low hills 223
  stable 111
building areal density 255

China 179, 423
cold front 423
convective
  boundary layer 35, 197
  conditions 243

desert soil 179
dispersion models 243
Doppler sodar 379
drag coefficient 53

eddy correlation 293

flow over hills 223, 447
flux footprints 273
forest canopy 273

ice sheets 81, 111, 475
internal boundary layer 1, 379
Ireland 359
islands 379

katabatic flow 475

land-surface scheme 391

mesoscale model 391
mixed-layer height 497

net radiation 161
numerical simulations 447

pressure, mean 327

shelterbelts 137, 151
spectral
  characteristics 423
  model 35
surface fluxes, regional variation 293
surface layer
  characteristics 309
  parameterisation 391

tropics 161, 309
turbulence
  closure model 447
  mixing of reactive gases 197
  observations 81
  parameterisation 243
  structure 111
  velocities 35

water and heat transport 179
windbreaks 327
wind characteristics of towns 255
wind climate of Ireland 359
wind profiles 475
